

RIZKY PRATAMA

Indonesia | Email: mrizky@tuta.io | LinkedIn: linkedin.com/in/mriztama | GitHub: github.com/ablahum

Fullstack Developer with 2 years of experience delivering scalable and production-ready web app using React.js, Next.js, Express.js, and Laravel. Skilled in integrating AI capabilities into modern app, leveraging LLMs, LangChain, RAG, Pinecone, and Hugging Face to build automation-driven products. Proven ability to streamline workflows, enhance cross-team productivity, and optimize deployment processes in remote-first environments.

PROFESSIONAL EXPERIENCE

PT. Idekreatif Menuasa Teknologi

Bandung, Indonesia

Full Stack Developer

February 2025 – present

- Manage and develop a core feature in an internal project management platform (similar to Jira) using Laravel and MySQL, collaborating with product and QA teams to ensure each deployment matched clients' workflows, resulting in 25% faster task tracking across 5+ corporate teams.
- Lead the CI/CD deployment workflow using Gitlab, and proactively optimize frontend (Alpine.js) and backend performance (Laravel and MySQL), working closely with cross-functional teams, resulting in significantly improved user engagement and reduced deployment issues across devices.
- Implement a mission-critical cron job feature using Laravel Scheduler, automating recurring data synchronization tasks that were previously manual, resulting in a 40% increase in support team productivity and saving 5+ hours/week.
- Improve task and responsibility management for client-side employees by enhancing the project management workflow using custom Laravel-based tools, and collaborating with client stakeholders and internal dev teams, resulting in a 25% increase in task completion rate and improved cross-functional collaboration.

PT. Kreasi Edulab Indonesia

Bandung, Indonesia

Back End Developer

July 2023 – November 2024

- Maintained, managed, and regularly inspected the information system used by over 900 internal staff and 5,000+ students, using Laravel, CodeIgniter, and MySQL, resolving issues proactively and reducing system-related complaints by 30% through continuous inspection and performance optimization.
- Developed a scheduling request feature using Laravel and Livewire to streamline the process for students booking additional study sessions, handling 200+ daily requests across 40+ branches, significantly reducing administrative workload and improving student access to extended learning opportunities.
- Developed a scholastic aptitude test feature using Laravel and Livewire, enabling students to assess their interests and strengths, and providing automated reports for counselors to support personalized academic planning, used by over 5,000 students across multiple branches.
- Developed a broadcast messaging feature using Laravel and WhatsApp API, enabling the academic division to send announcements and reminders to over 4,000 students and parents, significantly reducing manual communication time and improving outreach consistency.

Qwords x Rakamin Academy

Virtual Internship

Project-Based: Fullstack Developer

May 2023

- Implemented sorting and search algorithms in backend logic using Laravel to improve data handling in practice tasks.
- Integrated REST API specifications into frontend components using Laravel Blade, enabling dynamic data rendering for real-time user views during virtual internship project.

Core Initiative Studio x Rakamin Academy

Virtual Internship

Project-Based: Front End Developer

January 2023

- Transformed UI mockups into a responsive e-commerce website using Vue.js, integrating dynamic data and implementing core functionalities such as product listing, cart, and checkout.
- Converted static UI components into fully functional, responsive card elements using Tailwind CSS, improving visual consistency and modularity across the e-commerce project's product listing page.

OTHER EXPERIENCE

Jabar Digital Academy

Bootcamp

Full Stack Developer

February 2024 – May 2024

- Designed ERDs and business workflows in the early planning phase of each project, following SDLC best practices.
- Built web-based CRUD applications by translating business requirements into functional fullstack systems using Laravel, Blade, and MySQL.

Bangkit Academy by Google, GOTO, Traveloka

Scholarship

Mobile Development Cohort

August 2023 – January 2024

- Designed and built Android applications using Kotlin, collaborating with cross-functional teams (ML and Cloud) to solve real-world use cases.
- Applied Android development tools and libraries such as Jetpack, Retrofit, Room, WorkManager, and Gson, following SOLID design principles.
- Strengthened soft skills including critical thinking, project management, and professional English communication through intensive workshops and mentorship sessions.

SELECTED PROJECTS

PDF Summarizer App – SaaS built with Next.js, Tailwind, TypeScript, NeonDB

Built a fullstack web app using LangChain, OpenAI and Gemini API to allow users to upload PDF files and receive AI-generated summaries. Enabled user accounts, summary history, and payment using Stripe.

Emotion-Based Diary Analyzer – Web app built with Next.js, Shadcn, Tailwind, TypeScript, Pinecone

Developed an AI-integration web app that analyzes user-written diaries using sentiment analysis from Hugging Face, LLM classification, LangChain, RAG, and Pinecone. Visualized chatbot and emotion trends over time.

Point of Sales App – Internal app built with Laravel, Tailwind, Vue.js, PostgreSQL

Built web app for a local guesthouse to digitize and simplify manual bookkeeping and financial tracking processes. The system is designed with an efficient workflow in mind, addressing real-world issues faced by the client.

Realtime Location-Based Tourism App – Android app with Kotlin, Jetpack, Google Maps API.

Developed an Android app that enabled location-based recommendations, place filtering, and real-time reviews. Collaborated with ML & Cloud tracks.

EDUCATION

Universitas Islam Negeri Sunan Gunung Djati

Bandung, Indonesia

Bachelor of Islamic Philosophy - GPA: 3,56

Sep 2020 – 2025

- Organizational: Treasurer (PMII), Content Team (HMJ)

TECHNICAL SKILLS

- Programming Languages, Tools, and Framework: HTML, CSS, JavaScript, PHP, Bootstrap, Tailwind, React.js, Next.js, Vue.js, Node.js, Express.js, TypeScript, Laravel, CodeIgniter, Prisma, Git, Figma
- Databases: PostgreSQL, MySQL, Supabase, NeonDB, Firebase, MongoDB
- AI Tools & Integration: Large Language Model (OpenAI, Gemini, DeepSeek, etc.), LangChain, Retrieval Augmented Generation, Pinecone, Hugging Face
- Soft Skills: Problem Solving, Critical Thinking, Attention to Detail, Time Management, Growth Mindset
- Remote Work Skills: Comfortable with async communication, timezone coordination, Git-based collaboration, and agile workflows via tools like Jira, Slack, Notion, and Trello.
- Languages: English (Intermediate, Professional Working Proficiency), Indonesian (Native)
